1. Have 1 edit button to edit all at once

2. Error when trying to edit.

3. Maybe have a profile or avatar picture for each artist ?
   Make things more visual

Also can't seem to edit the artist his basic info?

4. I would call targert date → release date.
    Feels a bit weird.

5. Error when edit/save release date with a date close to today's date.
